

Audi  
Hungaria

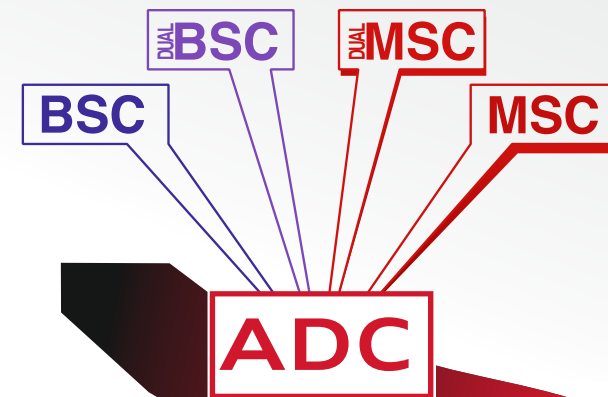

## Audi Development Camp

This innovative fast-track into the engineering profession provides fully project based education for vehicle and mechanical engineering students from **MSc and dual MSc** courses in the Central-Eastern European region.

Between **24 June – 19 July 2019**, over 4 weeks, teams of 5 students will be working on relevant projects **described by technical development** departments of Audi Hungaria.

ADC's unique educational concept contains **70% teamwork, 15% teaching and 15% presentations** to cover all aspects of the engineering profession. Once students pass the admission process successfully, they will have the opportunity to meet and discuss with engineering superstars, as the organizers are about to invite **engineering superstars from the world of motorsport** to teach and consult the students.

In order to meet with growing industrial expectations on masters graduate-level courses, Audi Hungaria introduces an all new educational concept in collaboration with Széchenyi István University, called Audi Development Camp.
