

Data Collection Specialist

[Trax](#) - world's leading image recognition platform for retail - is looking for a Data Collection Specialist who is passionate about establishing best practices for data collection, designing new collection processes, and answering data acquisition inquiries.

Your responsibilities will include:

- Design best collection flow for Trax customers
- Be the first point of contact for stakeholders regarding data acquisition inquiries
- Setting up implementation of data in apps and systems
- Oversee the system set up related to collection, monitoring, and projects
- Monitor progress, quality, and completion of the different audit initiatives
- Provide training and feedback to the field teams
- Work closely with R&D and Analytics teams to ensure accurate and effective reporting
- Management of third-party collection vendors (when applicable)

You are looking for us if You:

- Have strong analytical skills
- Understand how to interpret customer business needs and translate them into application and operational requirements
- Have profound Excel knowledge
- Have previous experience in working with information systems
- Are good at documentation, technical writing and have strong verbal communication skills
- Can fluently communicate in English
